SUMMARY

AI & Data Science graduate with hands-on experience in machine learning, NLP, data engineering, and full-stack development. Proficient in building end-to-end ML pipelines and deploying predictive models using Python, TensorFlow, Scikit-learn, Hadoop, and Spark, with additional expertise in SQL and Power BI for data analytics and BI dashboard development. Skilled in JavaScript, React, and Node.js for building interactive web applications, and experienced in integrating AI/ML solutions into production-ready systems. Seeking opportunities in Data Science, Machine Learning Engineering, AI Engineering, Data Engineering, or Software Engineering.

CORE SKILLS

Languages: Python, SQL, Java, C++, C

ML / AI: Machine Learning, Deep Learning, NLP, Predictive Modelling, Feature Engineering, Statistical Analysis, RNN, LSTM, K-Means Clustering, PCA, Unsupervised Learning

Libraries: Scikit-learn, TensorFlow, Pandas, NumPy, NLTK, Text Blob, Streamlit, Matplotlib, Seaborn

Data & BI: Power BI (DAX), MySQL, Hadoop, Apache Spark, Hive, MapReduce, Excel (Power Query), Deepgram API, gTTS

Web & Tools: React.js, Node.js, Apollo GraphQL, Git/GitHub, VS Code

Gen AI: LLM Basics, Prompt Engineering, Oracle GenAI, AI Workflows

Soft Skills: Team Leadership, Cross-functional Collaboration, Analytical Problem-Solving, Public Speaking, Bilingual Communication, Adaptability, Fast Learning

INTERNSHIP EXPERIENCE

Data Engineering Intern | Navitas Life Sciences, Chennai -- [View Completion Letter](#)

Jan 2026 – Apr 2026

- Built and deployed ML-ready ETL pipelines processing 1M+ FDA FAERS records using Python, Hadoop, and Apache Spark to support large-scale predictive analytics for pharmacovigilance
- Partnered with data engineering and business teams to design 5 Power BI reports on adverse drug reaction trends, cutting reporting cycle time by 30%

AI & ML Intern | Labmentix (Remote) -- [View Experience Letter, Certificate and LoR](#)

Sep 2025 – Mar 2026

- Trained and tuned Logistic Regression, Random Forest, and XGBoost models on 50K+ records with 15+ engineered features, lifting CSAT prediction accuracy by 18% (F1 vs. baseline)
- Applied K-Means clustering with PCA to behavioural data, surfacing 3 interpretable audience segments used in business strategy

Project Intern | Strack IT Pvt Ltd, Coimbatore -- [View Completion Letter](#)

May 2025 – Jun 2025

- Built a Python predictive-modelling proof of concept using statistical analysis on structured sales data, generating 5 actionable business insights
- Optimized the REST API data layer serving model outputs, working with developers to cut response latency by 40%

Data Analyst Intern | Null Class EdTech (Remote) -- [View Experience Letter and Certificate](#)

Sep 2024 – Nov 2024

- Cleaned and transformed 10K+ raw, unstructured Twitter/X records into analysis-ready datasets for downstream modelling
- Built 3 real-time Power BI dashboards with custom DAX measures to present engagement and sentiment insights to stakeholders

PROJECTS

Flipkart CSAT Prediction System [Python · XGBoost · SQL · REST API · Git]

- Engineered features and trained an XGBoost model on customer satisfaction data, structuring the pipeline for automated retraining as new data arrives
- Deployed the model behind a REST API for live predictions, with Git-based version control to track changes across iterations

Tesla Stock Price Prediction [Python · LSTM · TensorFlow · Streamlit]

- Built an LSTM time-series forecasting model in TensorFlow, training it on historical stock data to predict future price movement
- Deployed the model as a live Streamlit app with scheduled retraining, covering the full model lifecycle from training to production

YouTube Comment Sentiment Analysis [Python · NLP · NLTK · Text Blob · REST API]

- Built an NLP pipeline using NLTK and Text Blob to classify comment sentiment at scale
- Integrated the pipeline with the YouTube REST API for automated, hands-off comment monitoring

AI-Driven CO₂ Capture & Air Purification [Final Year Project · IoT · Real-time AI Prediction]

- Designed AI-based sensor decision logic to interpret real-time air-quality data
- Integrated the logic with IoT hardware to automate indoor air-quality control based on live predictions

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** -- Oracle University (Oct 2025) -- [View Certificate](#)
- **ISO 9001:2015 -- Master in Software Technology** (C, C++, HTML, CSS, JavaScript; Elective: Java), Grade A+ -- Tec Mac (Aug 2022 – Aug 2023) -- [View Certificate](#)
- **NPTEL – DBMS** -- [View Folder](#)
- **Other Certifications:** NPTEL-Introduction to Industry 4.0 and Industrial Internet of Things, NPTEL-Introduction to IoT, etc -- [View Folder](#)

EDUCATION

B.E. — Artificial Intelligence & Data Science | Aug 2022 – Jun 2026

Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore · **CGPA: 8.31/10**

ACHIEVEMENTS

- Smart India Hackathon 2024 — National Grand Finale Finalist & Team Leader (I-Flush IoT project) -- [View Certificate](#)
- 3rd Place — National Level Code Debugging Symposium -- [View Certificate](#)
